MANAGEMENT DISCUSSION AND ANALYSIS

Pursuant to the regulation 34 read with the Schedule V of the SEBI (Listing obligations and Disclosures Requirements) Regulations, 2015 you're Directors wish to report as follows:

ECONOMIC AND INDUSTRY OVERVIEW

A. INDUSTRY STRUCTURE AND DEVELOPMENTS

Domestic Scenario

Steel is crucial for the development of any modern economy and is considered to be one of the backbones of human civilization. The level of per capita consumption of steel is treated as an important index of the level of socio-economic development in a country.

In India, domestic steel use is estimated to grow by 6.5 % to 104 million tons in 2016-17 up from 94 MT in 2015, bucking the global trend which is expected to post a slower growth in steel demand. Total domestic demand for steel is estimated at 143.54 MTPA by 2016-17.India has become the world's 3rd largest producer of crude steel in 2016 against its 8th position in 2003. The growth in the Indian steel sector has been driven by domestic availability of raw materials such as iron ore and cost-effective labour. Consequently, the steel sector has been a major contributor to India's manufacturing output. The country has also been the largest sponge iron producer in the world since 2003 with coal based route accounting for 90% of total sponge iron production in the country during April- December 2016-2017 (prov.) Total finished steel exports during FY 2016-17 stood at 5.03 MT, whereas total finished steel imports stood at 12.45 MT for the same period. India's crude steel capacity has increased 8.2 per cent to 120.65 MT.

The steel sector in India contributes nearly two per cent of the country's Gross Domestic Product (GDP) and employs over 650,000 people. The per capita consumption of total finished steel in the country has risen from 51 Kg in 2009-10 to about 64.5 Kg in 2016-17. During the year Steel Industry registered a increase of 2.3%

Global Aspect

The economic environment facing the steel industry continues to be challenging with China's slowdown impacting globally across a range of indicators contributing to volatility in financial markets, sluggish growth in World economy. The global steel market is suffering from insufficient investment expenditure and continued weakness in the manufacturing sector. In 2016, while we are forecasting another year of contraction in steel demand in China, slow but steady growth in some other key regions including NAFTA and EU is expected. Growth for steel demand in all markets except China is expected in 2017.

World Steel forcast that global steel demand will increase by 1.3 % to 1533 MT in 2016. In 2017, it is forcast that world steel demand will return to growth of 0.4% and will reach to 1494 MT. World Crude Steel Production is down by -2.8 % as compared to year 2015-16. Asia's Crude Steel Production is down by - 2.3 % as compared to year 2015-16. China's share in world crude Steel production has increased from 49.30 % in 2016-17 to 49.50 % in 2015-16. China's over-supplied steel sector experienced years of plunging prices and factory shutdowns due to the sluggish economy. However, with encouragement from an upward trend in prices in March, many steel mills are resuming production. Indian Steel industry is passing through one of its toughest phase due to rise in imports which has put excessive pressure on domestic producers in order to ease pressure Government has taken various initiatives like safeguard duty, Minimum Import Price (MIP) & BIS. Government has also initiated anti-dumping investigations on certain countries including China, Russia, Japan & South Korea in order to save Indian Steel Industry from the current scenario.

B. OPPORTUNITIES AND THREATS

The Indian Steel Industry is poised for greater growth in the industrial sector and rise in infra expenditure projects in Railways, Roads and Highways etc.

Opportunities

- Unexplored rural market and Rapid Urbanization.
- Like flow of Foreign Investment under "MAKE IN INDIA"
- Increase Investment by Government in Infrasture.
- The Plan for smart cities, improved roads and rail connectivity by building highways bridges and dedicated freight and super fast rail corridor.

Threats

- Technological changes/ obsolescence.
- Substitute- Steel is being replaced by Aluminum in auto industry.
- Higher duties and taxes.
- Steel prices will also remain restrained due to global weak steel pricing trends.

C. SEGMENT – WISE OR PRODUCT-WISE PERFORMANCE

Our Company is currently producing only one type of product i.e. Structural steel hence there are no different segments for separate data to reproduce.

D. OUTLOOK

India's average Gross Domestic Product (GDP) growth has been estimated to grow by 7.4 per cent in 2017 and 7.4 per cent in 2018, up from 7.2 per cent in 2016 supported by industrial growth of which would gradually increase steel demand in the country.India, according to WSA, is one of the few countries to remain a "resilient" economy in the face of a "global slowdown" because of its commitment to "reforms".Indian steel demand in 2018 is expected to rise by over 8%. Hopefully, good showing in manufacturing, mining and electricity, will be sustained to generate improved demand for steel in the months ahead.

Access to infrastructure is an issue in India. As most new steel plants are likely to be situated in resource-rich states such as Odisha, Chhattisgarh, Jharkhand and Karnataka, these areas have become steel hubs needing access to infrastructure. Indian railways meet more than 70% of the steel industry's transportation needs. The Government will, therefore, need to plan for future rail network capacity and mobilize funds accordingly.

Cash flow for Indian steelmakers remains negative due to aggressive capital expenditure. This can have an impact on serviceability of debt in the short term. All investment are at all-timehighs and give an indication that the investment cycle in manufacturing will pick up gradually with interest rate cuts expected to start by the end of this fiscal year.

The Indian iron and steel industry is expected to register exponential growth in future, riding on a projected growth wave of infrastructure, automobile and real estate sectors and notwithstanding challenges of unavailability of land, raw materials, power, and unaffordable capital. If the industry has to achieve this ambitious target, one of the critical imperatives is to bridge the yawning gap between demand and supply of skilled workforce in the iron and steel sector.

The speed and degree of changes in the global economy and the increasingly complex interplay of factors influencing more globally integrated steel business make horizon watching essential. To succeed, steelmakers must determine how to optimize and create a new product mix and decide whether they are prepared to take the plunge to invest in new geographic markets.

E. CHALLENGES RISKS AND CONCERNS

Competitiveness is imperative for survival and success. To achieve sustainable growth and success in the Indian steel landscape, several critical success factors, enablers and building blocks are essential. The steel industry, generally intertwined with national economies, has been receiving support from respective governments both during the development phase and during times of economic downturn. Such benefits include cheap loans, tax

incentives, availability of subsidized land and trade tariff mechanisms. The Indian Government too plans to provide an enabling environment and introduce measures such as single e-window and creation of special purpose vehicles (SPVs) to meet the most significant challenges of land acquisition, regulatory approvals and infrastructure access.

Technological innovations have provided the competitive edge to the technologically strong companies. Smooth and quick transfer of technology has, however, meant an increasingly competitive pressure on the companies to be ahead of the others in the race for technological superiority to maintain and, if possible, to strengthen the bottom-lines.

We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance note") and the Standards on Auditing deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both isued by the Institute of Chartered Accountants of India. Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evalution of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degreee of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal controls over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the realibility of financial reporting and the preparation of financial statements for external purpose in accordance with generally accepted accounting principles. management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statement.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evalution of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degreee of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2017, based on the internal controls over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.
